Spectrum of a periodic signal. A signal  $x(t)$  that is periodic with frequency  $f_p$  can be factored into a single period  $x(t)$  convolved with an impulse comb  $p(t)$ . This corresponds in the frequency domain to the multiplication of the spectrum of the single period with a comb of impulses spaced  $f_p$  apart.

Digital signal processing (DSP) is the use of digital processing, such as by computers or more specialized digital signal processors, to perform a wide variety of signal processing operations. The signals processed in this manner are a sequence of numbers that represent samples of a continuous variable in a domain such as

time, space, or frequency.
