In nature, proteins are organized into highly ordered self-assembled structures with various morphologies and dimensions. In their Communication on page 10691 ff., Y. Ma, G. Chen, and co-workers report the fabrication of protein assemblies by using native protein LecA as a building block through sugar-protein interactions and rhodamine dimerization.

Cell theory states that the cell is the fundamental unit of life, that all living things are composed of one or more cells, and that all cells arise from pre-existing cells through cell division. In multicellular organisms, every cell in the organism's body derives ultimately from a single cell in a fertilized egg. The cell is also considered to be the basic unit in many pathological processes.
