The Files class is the other primary entrypoint of the java.nio.file package. This class offers a rich set of static methods for reading, writing, and manipulating files and directories. The Files methods work on instances of Path objects. Before proceeding to the remaining sections, you should familiarize yourself with the following common concepts:

File Operations (The Java™ Tutorials - Oracle

File sharing on developerWorks lets you exchange information and ideas with your peers without sending large files through email. You can browse public files, files associated with a particular community, and files that have been shared with you. You can upload files of your own and specify who may view those files. You can also pin files to keep them handy.
